Mr Graham Howard
Director – Operations
Copping Refuse Disposal Joint Authority
143 Nelson Road
MT NELSON TAS 7007

Dear Mr Howard

RE: Monitoring – Copping Waste Depot

In response to the letter submitted by Water Eco-science on December 23, 2004 in which you requested a change be made to the frequency of ground water and surface water monitoring at the Copping Waste Depot.

I agree with the assessment made by Water Eco-science and am prepared to alter the monitoring frequency requirements from quarterly to six monthly.

Until your permit is updated to reflect this change, please attach this letter to the rear of your Permit Conditions.

If you have any queries regarding this letter, in the first instance, please contact Iain Williams on 6233 3926 or at Iain.Williams@dpiwe.tas.gov.au

Yours sincerely

Dr Frank Cattell
DIRECTOR OF ENVIRONMENTAL MANAGEMENT
